PROFESSIONAL EMPLOYMENT AND RESEARCH EXPERIENCE

Green Bank Observatory

Postdoctoral Fellow

Green Bank, WV, USA

August 2023–Present

Using cyclic spectroscopy to study the small-scale structure of the Milky Way via pulsar scintillation. Assisting in the development and testing of the world's first (and currently only) cyclic spectroscopy telescope backend. Training Green Bank Telescope observers and reviewing technical justifications for observing proposals. Serving as the on-call scientist for observations, organizing colloquia and lunch talks. Supervised by Ryan Lynch.
